OExiallBT6X

**Setting up from
your phone**

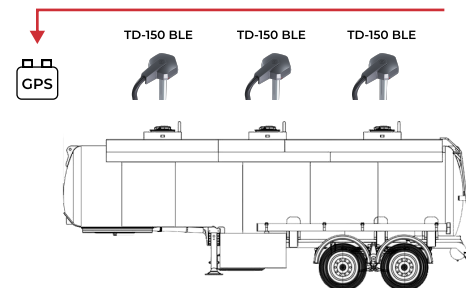

Plug into a
power source
and set up via
your cell

Time-tested sensor in a new housing, with an additional protective cover, the possibility of setting from a cell phone and data transfer technology Bluetooth Low Energy (BLE).

Monitoring of fuel and lubricants in tankers

After installation of the monitoring system the data on filling stations, fuel consumption and discharges, vehicles location, real-time reports became available. It had been possible to identify and eliminate false and incomplete refueling, fuel theft through hatches, manipulation of the dispensing gun, cut fuel costs by 15%, cut maintenance costs by 10%.
