Control of fuel consumption in special equipment in the mining industry

Kazakhstan

The introduction of the system of fuel consumption control in special machinery made it possible the fuel consumption control even outside the zones GSM/GPS.

Since then the fuel consumption was reduced by 1/3 (31%)

The amount of fuel costs before the implementation of the Escort Monitoring System was 26 691 641 rubles and after is 18 317 900 rubles.

Monthly customer profit savings – 7 748 741 rubles.
