Default platform is **www.wanwaygps.com**
Connect the device to another platform, please send the SMS command to change the server IP:

Domain setting
Format: **IP Domain Port**

3.Check Param Setting

You can check the parameter setting by command: CXZT
Eg: CXZT
Reply Content includes:
ID, IP, APN, ACC, GPRS, GPS, etc.

9 Working Description

- Turn on the switch after inserting SIM card and connect the device to the vehicle power, and then the indicator lights will start blinking.
- If the device is using its own built-in battery, the power indicator light (red) will slowly blink after turning on manually.
- A few seconds later both GSM light and GPS light will be steady and device will enter into normal working status.

10 Trouble Shooting

Problem	Description	Solution
Failed to connect the internet	SIM card not installed	Check the SIM card
	SIM card not installed properly	Install again
	No GSM network	Move the device to the GSM network area
	Weak GSM network	Move the device to strong GSM network area
Location failed	SIM card has no GPRS functions	Contact SIM card supplier to activate the GPRS function
	Always reply "failed to get location"	Contact the supplier
No GPS location	Some poor signal areas like basement, tunnels are not able to acquire GPS signals	Move the device to open sky areas
